SUMMARY

- Full Stack Web Developer and Computer Science Engineering student with strong expertise in building scalable and responsive web applications using Python, Django, React.js, and modern web technologies. Skilled in developing secure REST APIs, integrating databases like PostgreSQL and MongoDB, and creating responsive frontend interfaces using Bootstrap, HTML, CSS, and JavaScript. Experienced with Git, Docker, and backend–frontend integration, with a strong focus on clean architecture, performance optimization, and real-world problem solving.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, Python,
- **Web Technologies:** React.js, Bootstrap, Django
- **DevOps & Infra:** Postman, Docker, Git, GitHub, GitHub Actions
- **Databases & Frameworks:** PostgreSQL, MongoDB, Prisma, Drizzle ORM
- **AI & Systems:** RAG systems, AI agents, LLM tooling, MCP servers

EXPERIENCE

Internship

March 2025 — Present

Full Stack Developer Intern

- Developed backend modules using Django framework
- Built responsive frontend interfaces using HTML, CSS, and JavaScript
- Worked on real-world projects, improving debugging and optimization skills
- Collaborated on seamless frontend-backend integration

PROJECTS

AgroIntel AI – AI-based Crop Disease Detection System

2025 — Present

Python |NLP (NLTK/spaCy, TF-IDF)| Django REST API | React.js

(github.com/officialhemant001h/)

- Developed a deep learning-based system for plant disease detection using CNN and ResNet architectures
- Improved model performance using data augmentation techniques and Adam optimizer
- Built Django REST API for real-time disease prediction and model inference
- Created a React.js frontend enabling image upload and instant diagnostic results

AI Autonomous Research Operating System (AI-ROS)

May 2026 — Present

React.js | TypeScript | Django | PostgreSQL | Redis | Docker | LangChain | CrewAI | ChromaDB
(github.com/officialhemant001h/AI-ROS)

- Built a full-stack AI SaaS platform with autonomous multi-agent workflow system.
- Developed responsive UI using React.js, TypeScript, Tailwind CSS, and ShadCN UI.
- Implemented Django backend with JWT authentication, REST APIs, and WebSocket support.
- Integrated AI agents for research, planning, reporting, and workflow automation.
- Added RAG-based semantic search and AI-powered file intelligence using ChromaDB.
- Configured Docker, Redis, Celery, and GitHub Actions for scalable deployment and CI/CD.

EDUCATION

Khwaja Mohiuddin Language University

Noida

Bachelor of Technology in Computer Science and Engineering

Sep 2023 — Present
